Keerthana S

+91 9538619791 — yashodhakeerthi19@gmail.com — LinkedIn — GitHub — LeetCode

Summary

Aspiring Software Engineer and B.Tech Information Technology student with hands-on experience in Full Stack Development using React.js, Node.js, Express.js, MongoDB, and Python. Strong foundation in Data Structures and Algorithms, Object-Oriented Programming, DBMS, Operating Systems, and Computer Networks. Passionate about building scalable, user-centric web applications and solving real-world problems through software development.

Skills

Programming Languages: C++, Python, JavaScript, SQL
Frontend: React.js, HTML5, CSS3, Tailwind CSS, Vite
Backend: Node.js, Express.js, Flask, REST APIs
Database: MongoDB, MySQL
Core CS Concepts: Data Structures & Algorithms, Object-Oriented Programming (OOP), Database Management Systems (DBMS), Operating Systems, Computer Networks
Tools & Platforms: Git, GitHub, VS Code, Postman, Vercel, Streamlit, Odoo ERP

Education

B.TECH Information Technology **Graduating: 2027**
CMR University, Bangalore *CGPA: 9.19 / 10*

Experience

Bluzee IT Consultants Pvt. Ltd. **May 2026 – June 2026**
ERP Fundamentals (Odoo) Internship *Tools Used: Odoo ERP*

- Configured and managed users, companies, products, and inventory workflows within Odoo ERP.
- Implemented CRM pipelines, lead management, and sales process automation.
- Executed end-to-end sales and purchase workflows including quotations, invoicing, delivery validation, and payment processing.
- Worked with inventory management, inter-company transactions, and order lifecycle automation.
- Gained hands-on experience with enterprise software architecture and business process automation.

Virtual Infosys Springboard Internship **November 2025 – January 2026**
Artificial Intelligence Intern *Tools Used: Python, NLP, Streamlit, scikit-learn*

- Developed an NLP-based **Narrative Nexus** text analytics solution to process and analyze unstructured textual data.
- Implemented text preprocessing techniques including tokenization, stop-word removal, stemming, and lemmatization.
- Built modular processing pipelines for sentiment analysis, topic modeling, and text summarization.
- Applied machine learning and NLP techniques to extract meaningful insights from large text datasets.
- Created interactive visualizations and dashboards to improve data interpretation and decision-making.

Projects

Book Store Management System **April 2026**
Personal Project *React.js, Node.js, Express.js, MongoDB*

- Built a MERN-stack web application for managing book inventory using React.js, Node.js, Express.js, and MongoDB.
- Designed and implemented RESTful APIs supporting Create, Read, Update, and Delete (CRUD) operations for book management.
- Integrated MongoDB Atlas using Mongoose to manage and persist application data efficiently.
- Developed reusable React components and implemented client-side routing using React Router.
- Utilized Axios for frontend-backend communication and implemented real-time user feedback through notification systems.

EDA Tool Project **April 2026**
Personal Project *Python, Flask, Pandas, Matplotlib, Seaborn, ReportLab*

- Developed a web-based EDA tool using Flask for automated data analysis and visualization.
- Implemented secure file upload functionality supporting CSV and Excel formats.
- Generated interactive plots including histograms, box plots, and correlation matrices using Matplotlib and Seaborn.
- Created PDF report generation with data summaries, statistics, and embedded charts using ReportLab.

Narrative Nexus – Dynamic Text Analysis Platform **November 2025 – January 2026**
Internship Project *Python, NLP, Streamlit, scikit-learn*

- Built a text analytics web application using Python and Streamlit with modular data processing pipelines.
- Implemented machine learning models to extract insights from large text datasets.

Python Voice Bot **May 2026**
Personal Project *Python, SpeechRecognition, pyttsx3, APIs*

- Developed a voice-controlled virtual assistant using Python to automate common user tasks through speech commands.
- Designed a modular architecture to enable easy extension of voice commands and functionalities.

Certifications

- **Python for Data Science – IBM (2024):** Learned Python programming, data analysis, and data visualization for data science applications.
- **Green Skills and Artificial Intelligence under Skills4Future Program – Edunet Foundation (October 2025-February 2026):** Gained knowledge of AI fundamentals, sustainability concepts, and industry-oriented green technology practices.
- **Databases for Developers: Foundations – Oracle Academy (2026):** Achieved a **Certificate of Excellence** with a score of **96%**. Learned relational database concepts, SQL fundamentals, database design principles.
- **Deloitte Data Analytics Job Simulation – Forage (June 2026):** Completed practical tasks in data analysis, business problem-solving, and forensic technology through real-world simulations.
